DO NOT SCALE DRAWING		SCALE: 1:32 WEIGHT:		SHEET 2 OF 2	

****Use hand tools, impact wrenches may cause damage if over torqued.****

Preparation

- 1) Remove the bolts to the two most rearward cross bars on your RCI roof rack.

Figure 1: Hardware removal.

Installation

- 2) Begin by unpacking and removing all components and hardware. Please verify that all hardware and mounting components are present. Reference your original order invoice and verify all items are accounted for.
- 3) Collect the hardware that was previously removed. Align the extrusion's threaded holes with the slot and bolt on the molle panel. Install the hardware.

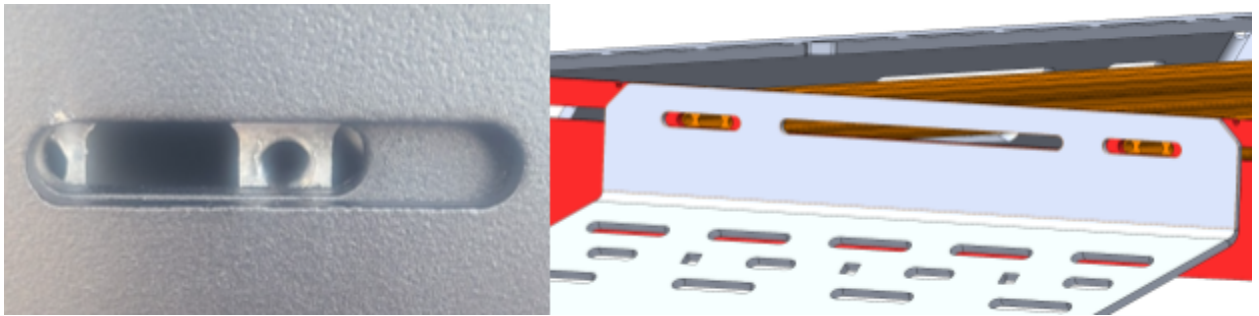

Figure 2: Upper hardware installation

- 4) Collect the two suction cups. Slide them up between the molle panel and the window to align with the depicted holes.

Figure 3: Suction Cup Alignment

- 5) Collect the provided $\frac{1}{4}$ "-20 x $\frac{1}{2}$ " bolts (2) and the $\frac{1}{4}$ " washers (2). Install the hardware into the suction cups through the aligned holes and tighten.
 - a) Align the vacuum pump to point down where it is easiest to access.

Figure 4: Suction Cup Hardware Installation

- 6) To attach, press down slightly and pump until the orange indicator disappears. To remove, pull either tab on the vacuum pad upward and toward the center.
 - a) Check the seasucker suction indicator as needed.
