****Use hand tools, impact wrenches may cause damage if over torqued.****

Preparation

- 1) Remove the bolts to the two most rearward cross bars on your RCI roof rack.

Figure 1: Hardware removal.

Installation

- 2) Begin by unpacking and removing all components and hardware. Please verify that all hardware and mounting components are present. Reference your original order invoice and verify all items are accounted for.
- 3) Collect the two suction cups. Align the seasucker mounting holes with the circular holes.

Figure 2: Suction Cup Alignment

- 4) Collect the roof rack hardware that was previously removed. Align the extrusion's threaded holes with the slot and bolt on the molle panel. Install the hardware.

Figure 3: Upper hardware installation

5) To attach suction cups, press down slightly and pump until the orange indicator disappears. To remove, pull either tab on the vacuum pad upward and toward the center.

a) Check the seasucker suction indicator as needed.
